

1

Toolbar

❑ Dùng để tạo những công cụ (có thể hiểu là các biểu tượng chức năng) thường dùng để thuận tiện cho người dùng sử dụng khi click vào

VD: Toolbar word 2017

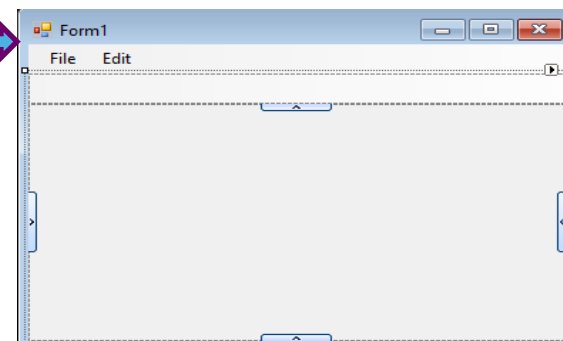

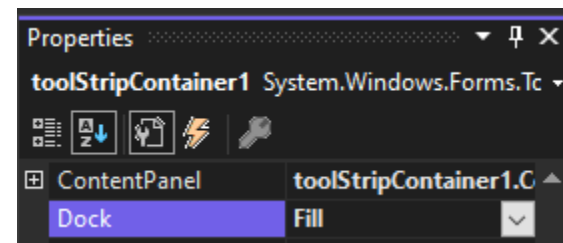

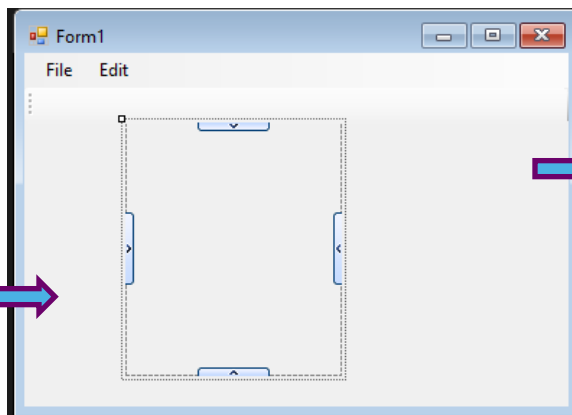

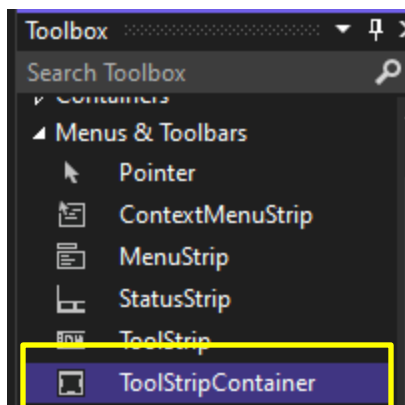

1

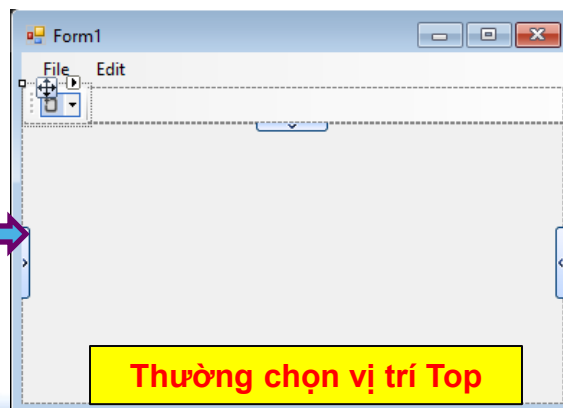

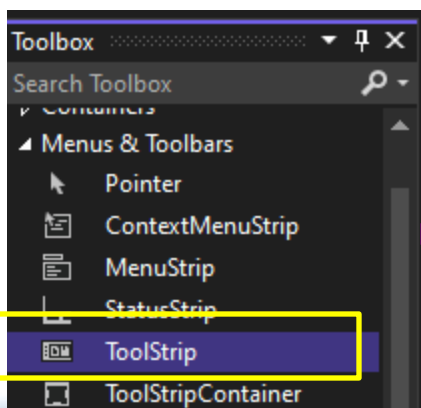

Toolbar

❑ 1. ToolStripContainer :

✓ Dùng để định vị trí cho toolbar (1 trong 4 vị trí)

❑ 2. ToolStrip

Thường chọn vị trí Top

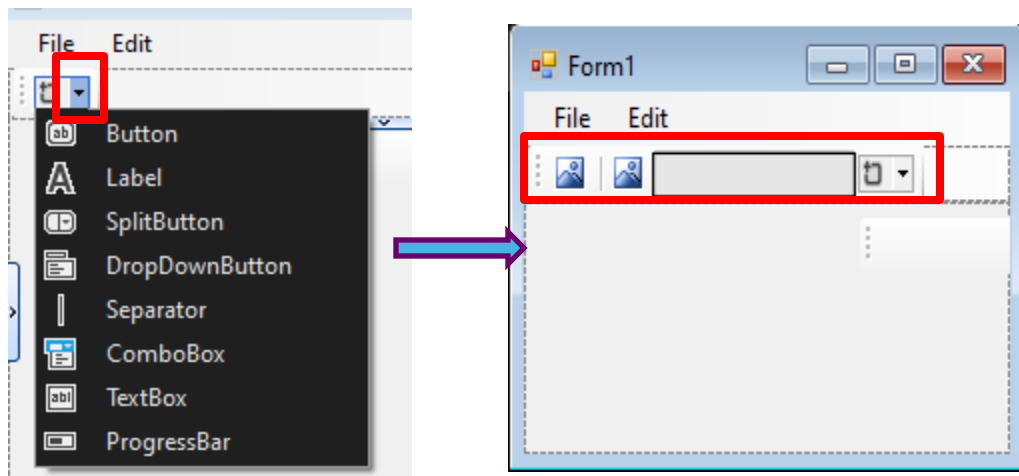

1

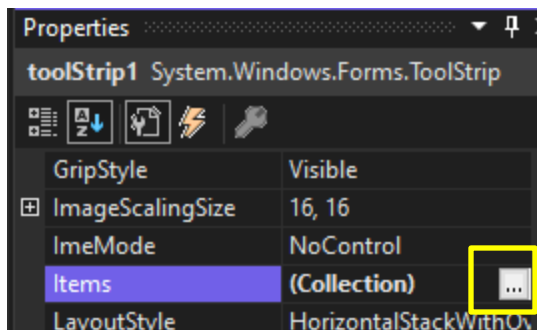

Toolbar

❑ 3. Thêm Toolbar :

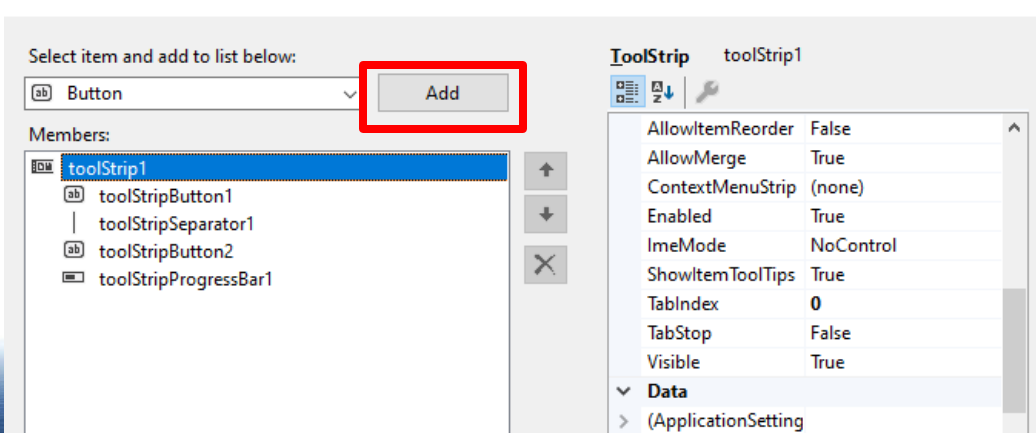

✓ *cách 1 : Thêm trực tiếp trên form*

✓ *cách 2 : Thêm qua properties **Items***

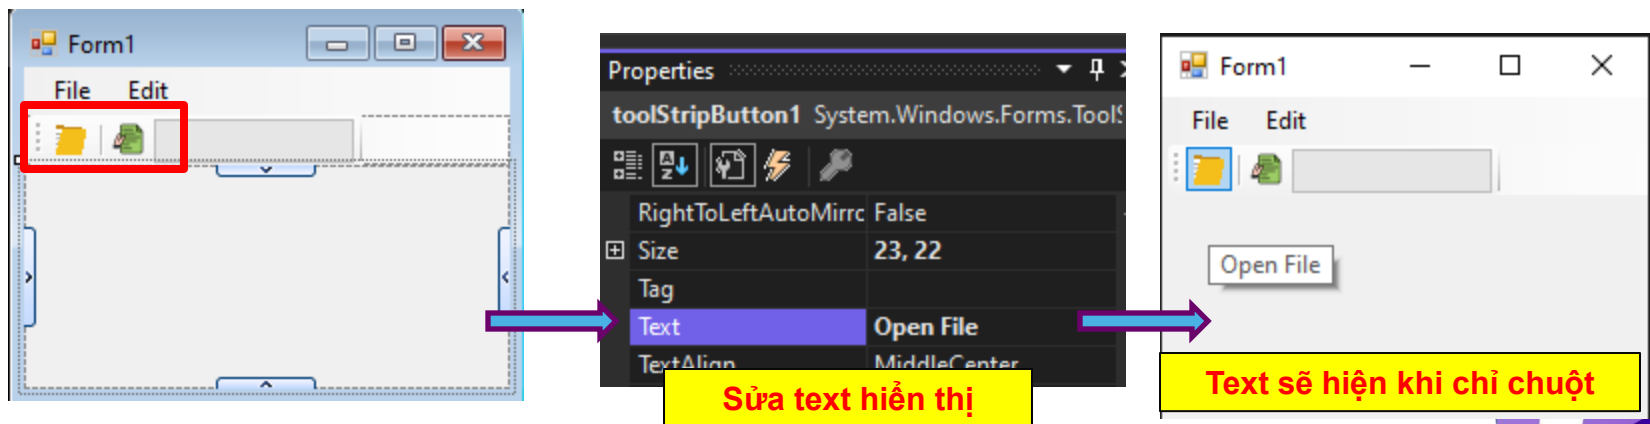

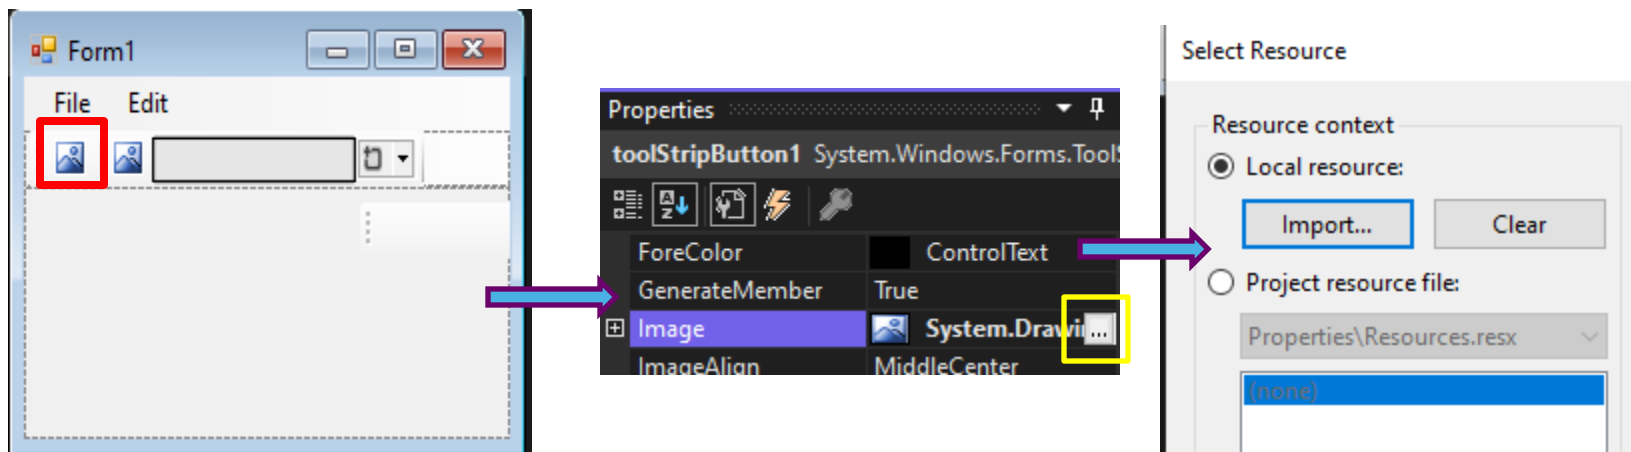

Items Collection Editor

1

Toolbar

- ❑ 4. Thêm icon hình ảnh vào toolbar : <https://bit.ly/3xi88TH> Link 1 vài icon

Sửa text hiển thị

Text sẽ hiện khi chỉ chuột

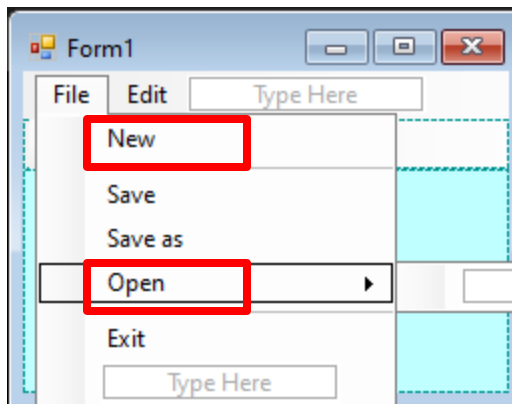

#

1

Toolbar

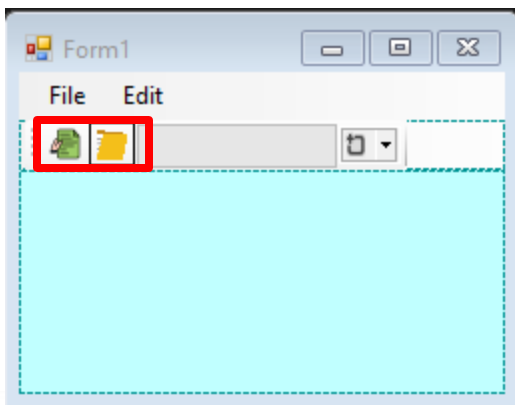

❑ 5. Gán lệnh cho các toolbar :

- ✓ *Bản chất các toolbar là các shortcut để tiện thao tác*
- ✓ *Ta cần viết lệnh cho các khối menu chính trước*

```
1 reference
private void mnuFileNew_Click(object sender, EventArgs e)
{
    MessageBox.Show("Bạn đã tạo file mới");
}

1 reference
private void mnuFileOpen_Click(object sender, EventArgs e)
{
    MessageBox.Show("Bạn đã mở file");
}
```

```
1 reference
private void btnNewFile_Click(object sender, EventArgs e)
{
    //lệnh click vào mnuFileNew
    mnuFileNew.PerformClick();
}
```

```
1 reference
private void btnOpenFile_Click(object sender, EventArgs e)
{
    mnuFileOpen.PerformClick();
}
```

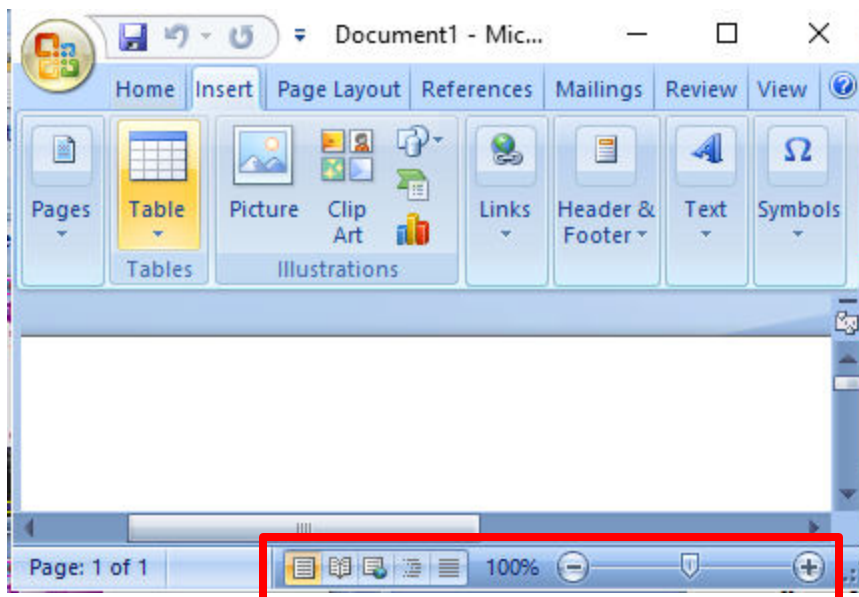

2

Statusbar

❑ 6. Statusbar :

✓ Thường nằm phía dưới , dùng để hiển thị trạng thái

VD: Statusbar word 2017

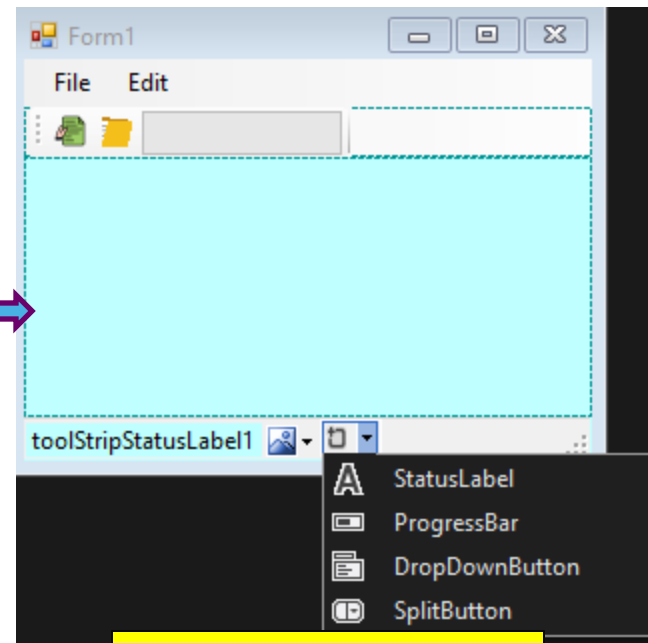

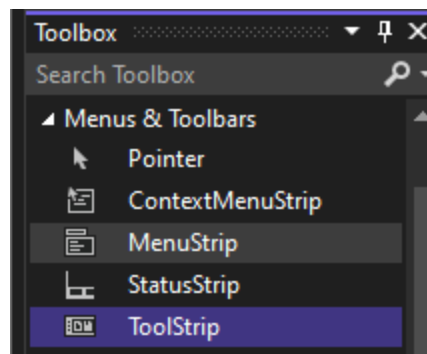

2

Statusbar

❑ 7. Kéo thả ToolStrip :

✓ *Thao tác giống ToolStrip*

Add thêm control
